CHANGE: Password required for "union" wireless network - Effective August 2, 2018
07.26.2018

UPDATED: In order to provide better security on our public wireless network, Union College will be requiring a password to join the "union" WiFi. This new step will be effective starting on August 2nd at 9:00 am.

The password to join the "union" WiFi is UNION1795. This password is case sensitive. This password is not a secret and all members of the campus community and guests are allowed to use this network.

Registration is still required and that process remains the same as before once you connect to the "union" WiFi.

Instructions for Windows and Mac OS are attached. We will be making this information available in our Knowledge Base on our new ticketing system [1].
