ITS Networking staff provide infrastructure planning, design, and installation services to meet Union's current and future computing and communications needs. Networking services provide connectivity for academic, professional staff and students through wired and wireless connections. Services provided include:

- **VPN connection** [1] - provides access to on-campus resources from off-campus
- **Residence Hall Computer Network (ResNet)** [2] - in partnership with Apogee, high-speed internet access (wired and wireless) is provided to the Residence Halls
- **Eduroam** [3] - Visitors from eduroam-enabled institutions should use the "Eduroam" wireless network. You can login using your "home" institution login credentials.
