Academic Computing Steering Committee
(AcCSC)

Minutes of Meetings:
February 23, 2001; ME conference room; 9:45 am

Present: Batson, Boyer, Keller, Klein, Sener, Traver, Wolf

Review of last meeting’s minutes

Cabling: OC3 line being laid; our router is not working right; Verizon is trying to get things right.

Copyright: Tom gathered the best information; online and from personal contacts, and created a large binder of “best practice” information.

Dave eliminated duplication, and condensed the material. The basic gist is that we support national (and international?) law. This is not itself a legal document, it is an attempt to interpret the law.

On page 17, copyright in distance education, this is a murky area; the draft includes six pages from Kenneth Crews at Indiana University.

This document will work better as a web site, so that users are directed to the relevant site.

The understanding is that if a college employee making a good faith effort to follow the guidelines, the College will back the employee.

We should probably review and, where necessary revise, these guidelines annually.

Question for Tom M.: What is the status of digital reserve?
**Wireless:** Have a wireless pilot running; 29 students have cards we gave. Nearly full coverage in the Nott. (Access point is 3rd floor near elevator. Dutch Hollow is nearly ready, we are waiting for a cable. Olin learning center; and a bit outside. Second floor Steinmetz. 1 and 2 floors of Library.

**Distance Learning.** GMI project is at the State for approval, slated to begin this Summer, pending approval.

OCS has some requests for BlackBoard for next term.

Next meeting: March 2, 2001    9:45am
