General Types of Electronic Classrooms

Presentation Classroom
These rooms have a ceiling-mounted data projector, two computers (1 Macintosh, 1 PC), laptop connection, VCR, multi-region DVD player, and document camera. These rooms do not have computers for student use.

Collaborative Classroom
Collaborative classrooms have a ceiling-mounted data projector, one computer (either Mac or PC) for the instructor, laptop connection, VCR, multi-region DVD player, and document camera. These rooms all have computers for student use. The student to computer ratio ranges from 1:1 to 4:1 depending upon class size.

Laptop and Laptop/Seminar Classroom
It has a ceiling-mounted data projector, and a combination DVD/VCR player (not multi-region). The faculty member will need to provide the laptop although ITS does have a program for loaning laptops for the teaching term.

Special Configuration
Rooms marked as “Special Configuration” have a ceiling-mounted data projector. They have a laptop connection and often have a PC installed for the instructor. A “special configuration” classroom may have other equipment (document camera, for example) installed. Often, the room is a studio style classroom with some computers available for student usage.
By the Numbers

- 81 – Total Number of Classrooms (not labs) --- note: this is Mary’s count and may not match Registrar’s office
- 61 – Electronic Classrooms
- 32 – Generally Schedulable
  - 16 Presentation (18 if consider Olin 106/107 as presentation)
  - 5 Collaborative (3 if consider Olin 106/107 as presentation)
  - 11 Laptop
- 29 – Not Generally Schedulable
  - 3 Presentation
  - 16 Collaborative
  - 4 Laptop
  - 6 Special Configuration
- 20 – Classrooms without Technology
