Join **Denise Snyder**, Director of ITS Learning Technologies + Environments, as she discusses how the deliberate use of learner-centered pedagogies, coupled with new and emerging technologies, can promote deeper exploration and engagement with course concepts and materials. Following the lunch talk, Denise and the Learning Technologies and Environments staff will be available all afternoon to help faculty setup these new technologies (or just answer general start up questions!) just in time for the spring term.

**March 26th, 2018**
